Barska® Security Solutions: Protecting What Matters Most

In a world where threats to safety and security are ever-evolving, Barska® stands as a steadfast guardian. We understand that peace of mind is invaluable, and our mission is to provide the tools and solutions you need to protect what matters most. With a legacy rooted in innovation and a commitment to excellence, Barska® has earned its reputation as a trusted provider of security solutions for homes and businesses alike.

From safeguarding your valuables and personal belongings to ensuring the safety of loved ones, Barska® offers a comprehensive range of products designed to meet your specific needs. Our team of experts meticulously crafts each product, combining cutting-edge technology with superior craftsmanship to deliver exceptional performance and durability.

Whether you're seeking a secure haven for your firearms or a reliable safe for your precious jewelry, Barska® has the solution. Trust in our expertise and experience to provide the peace of mind you deserve.

A Wide Range of Security Options to Meet Your Needs

Barska® offers a comprehensive selection of security products to address diverse requirements. Whether you need to secure important documents, protect firearms, or keep valuables safe from fire and theft, Barska® has a solution for you. Here's a closer look at some of our offerings:

Mailboxes: Barska® mailboxes come in various configurations, including parcel mailboxes for secure package delivery, locking mailboxes for added protection against mail theft, and wall-mounted mailboxes for convenient placement.

Key Cabinets: Keep your keys organized and readily accessible with a Barska® key cabinet. These cabinets are ideal for businesses like real estate agencies, property management companies, and hospitality services that manage numerous keys.

Safes: Barska® safes are a cornerstone of our product line. We offer a wide variety of sizes and functionalities, including gun safes for secure firearm storage, jewelry safes for safeguarding precious belongings, and fireproof safes for an extra layer of protection against fire damage. Many Barska® safes boast biometric fingerprint scanners for quick and convenient access while maintaining top-notch security.

Door Locks: Upgrade your home or office security with a Barska® biometric keypad door lock. These versatile locks offer three methods of entry: fingerprint scan, keypad code, and traditional key. This way, you can choose the most convenient access method for different situations.

Unwavering Commitment to Quality and Security

Barska® prioritizes quality in every step of the design and manufacturing process. Our products are built to meet rigorous standards, ensuring they provide long-lasting durability and reliable security. Additionally, Barska® stays at the forefront of security technology, constantly innovating to offer the best possible protection against evolving threats.

Invest in Peace of Mind with Barska®

By choosing Barska® security solutions, you gain peace of mind knowing your valuables and loved ones are protected. Our extensive product range, unwavering commitment to quality, and dedication to security advancements make Barska® a brand you can trust.

SAFE TERMINOLOGY

Here is some of the most common terminology for safes and security systems. In addition to terminology for standard safes, we have also included terminology specific to our biometric fingerprint scanner technology. This information will help you understand each safe's features and specifications. Barska uses standard safe terminology in specifications to make choosing a safe a quicker and simple process.

BIOMETRIC SCANNING IMAGE SENSOR

The Biometric safe fingerprint image sensor uses an optical sensor to create a bio algorithm (encrypted mathematical key) of your fingerprint and stores this to memory to access the safe. The Biometric sensor uses advanced industry leading algorithm-mapping technology to read your fingerprint to unlock the safe.

BIOMETRIC USER MEMORY

Biometric safes store fingerprints recognition to internal memory storage. Note that these are mathematical keys and not the actual image of a fingerprint. All Barska biometric safes allow multiple users to be saved in memory. It is also recommended to scan and store multiple fingers in to the safes memory in case of extreme injury to a finger.

USER FINGERPRINT REGISTRATION

A new Barska Safe is in demo mode, which allows any fingerprint to open the safe. You will need to register a user fingerprint to lock the safe. Simply press and release the registration button on the inside of the safe, then place your finger on the scanner so that the optical sensor can scan your fingerprint. You will hear a confirmation beep when successful.

CALIFORNIA DEPARTMENT OF JUSTICE APPROVED

Select safe models have been tested and approved by the California DOJ as a firearm secure storage device. The California DOJ testing procedure is the strictest in the country and qualifies for all 50 state guidelines.

DEADBOLT SYSTEM

Select safe models feature motorized dead bolts. These are the thick steel bolts seen protruding from a safe's door. When the safe is locked the bolts slide into position behind the door jamb, anchoring the door firmly shut. Motorized deadbolts secure the locking system preventing any tampering that may cause locking solenoids to fail. Non-motorized deadbolt safes use less power and feature a longer battery life.

MOUNTING

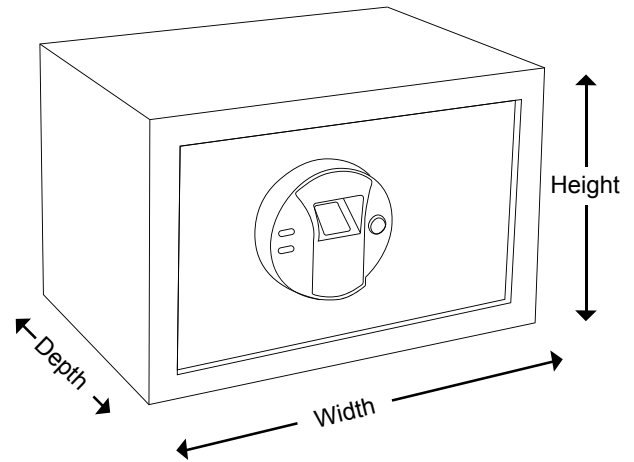

Select safe models feature pre-drilled mounting points on the bottom and at the back of the safe. The included lag-bolts allow you to securely attach your safe to a fixed structure. For added security, it is recommended that safes be secured to a solid structure to prevent the safe from being knocked over or from being carried away.

BATTERY LIFE

Select safes are powered by standard AA batteries and can last up to 2 years with normal use. Non-motorized deadbolt safes use less power and feature a longer battery life. If the batteries have lost their charge the safe can still be opened via the mechanical back-up key or by using a temporary power bypass that connects externally to the safe.

SECONDARY BACK-UP KEY ACCESS

Select safes feature a secondary back-up mechanical key access. The access point is normally hidden. All Barska Safes come with a set of back-up keys.

OUTER DIMENSIONS

Depth - Describes the depth of the safe, from front to back, as measured on the outside.

Width - Describes width of the front of the safe, from outside edge to outside edge.

Height - Describes the height of the safe, from top to bottom, as measured on the outside.

SAFE ONE YEAR LIMITED WARRANTY

(Within USA and Canada only)

This warranty does not cover consumer-caused damages, abuse, normal wear-and-tear, unauthorized repairs or modifications. For further detailed information, please refer to the warranty policy enclosed with products. Select models.

BARSKA SAFES

Barska biometric safes are the ultimate in quick access security solutions for the home and office. Secure and access your valuables in seconds with the simple scan of a fingerprint. With Barska biometric safe you will no longer have to waste time looking for your keys or entering a combination, to access your safe all you need is your fingerprint. Barska biometric fingerprint scanners are the highest resolution and most advanced in the safe industry. In addition biometric safes, Barska also offers a wide range of safes with a variety of access mechanisms, sizes, and features. Barska also manufactures a wide selection of basic secure lock boxes such as cash boxes, multi key storage safes, compact combination safes, diversion safes and digital keypad safes.

Biometrics Safes | Frequently Asked Questions

Biometrics Safes | Frequently Asked Questions

What are “biometrics”?

Biometrics can be taken literally as ‘life measurement. The term is usually associated with the use of unique physiological characteristics--such as fingerprints--to identify an individual. The term is mostly associated with security because biometric traits can be used for authentication where a special characteristic of an individual is used to identify them.

Is biometric technology mature?

Yes. Biometric technology has been around for many years being used most effectively for time and attendance and workforce management. Modern advances, coupled with reductions in cost, now make biometrics readily available.

Barska is leading the industry in the integration of biometrics technology for consumer applications. Barska has invested significant resources into the integration of biometric fingerprint scanning technology into safes, lock boxes, and door knobs resulting in affordable, high quality solutions.

What is a “biometric” safe?

Simply put, a biometric safe is a secure enclosure that uses biometric identification—instead of traditional keys, combinations, or cards—to activate and deactivate the locking mechanism.

In the case of Barska’s BioSecure Technology™, a fingerprint is scanned by sensors that identify the specific mapping of the pre-registered fingerprint to activate mechanical bolts.

What are the benefits of a biometrics safe?

Security. Keys for safes can be duplicated and lost, combinations can be compromised and forgotten, but no one can duplicate a fingerprint. Barska’s biometric scanner is the most secure option available today.

The duplication of biometric fingerprint technology is virtually impossible, only one in one billionth of a chance. Biometric security offers a positive method of user identification with something that cannot be lost, replicated or stolen.

Simply Put...

- Fingerprints are much harder to fake than identity cards.
- You can’t guess a fingerprint pattern like you can guess a password.
- You can’t misplace your fingerprint, like you can misplace an access card.
- You can’t forget your fingerprints like you can forget a password.

Quick Access

Biometric safe access is instantaneous. Place your finger on the scanner then in under a second the locking mechanism is engaged to open the safe or door, and vice versa. This proves particularly beneficial in times of high stress. No fumbling with keys or mis-typing numbers in a keypad; simply place your finger on the scanner and you have access.

Lower Cost And Practicality

Fingerprint access eliminates the cost and problems of issuing and managing keys or cards, and there is no PIN to forget, or give away. You will no longer need to change credentials each time a credential is lost or stolen. Lost keys and cards represent not only a security issue, but also impart undo costs and inconvenience on the security manager.

Secure and Share: Biometric Access Control for Everyone

Biometric templates cannot be reverse-engineered to recreate personal information and they cannot be stolen and used to access personal information. Also, if desired, access can be granted to multiple people by scanning multiple fingerprints and storing their biometric registrations in the module. This has proven to be highly beneficial to families, police departments for evidence and firearms security, assisted living homes, hospitals for medicine and equipment access, sober-living homes, courtrooms. And no keys to worry about.

What about photocopies or other artificial means to “spoof” the biometrics module into thinking that it is my fingerprint?

The duplication of fingerprint technology is virtually impossible. The act of photocopying a fingerprint that you may have seen in the movies is only in the movies. Biometric technology proves to be a security that cannot be lost, replicated, or stolen unlike keys, key cards and combinations.

Fireproof Safe Vaults

Keypad Fireproof Safe Vaults

These FireVault Digital Keypad Safes are renowned for their ability to provide top-notch security for your most valuable possessions. They are meticulously crafted with steel and fireproof gypsum board materials, offering superior protection against blazing infernos. This ensures your firearms, irreplaceable documents, and precious jewelry remain safe even when exposed to extreme temperatures.

Beyond fire protection, the FireVault series boasts robust security features to deter potential intruders. Solid steel locking bolts create a formidable barrier against break-in attempts, giving you peace of mind that your valuables are shielded from theft. For user convenience, the safes are equipped with a quick entry electronic keypad. This allows for authorized access at a moment's notice, eliminating the need to fumble with keys in stressful situations.

Recognizing that storage needs vary, we offers a diverse range of FireVault safe sizes. This enables you to select the perfect option that accommodates your specific requirements and budget. Whether you're a gun owner seeking a safe haven for your firearms and ammunition, a collector protecting treasured jewelry, or a homeowner safeguarding vital documents, there's a FireVault Safe suited for your needs. By choosing a Barska FireVault Safe, you're not only safeguarding your valuables against the threat of fire, but also investing in a reliable security solution that offers long-lasting peace of mind.

RIFLE SAFES

Barska is your trusted partner in safeguarding your valuable firearms collection. Explore our extensive range of Firearms Safes, available in various sizes and equipped with cutting-edge locking mechanisms, including Biometric and Keypad locks. Our collection includes:

All-Purpose Firearms Safes

Versatile safes designed to accommodate a wide range of firearms, providing security and peace of mind for both gun enthusiasts and collectors.

Firearms Storage Safes

Responsible firearm storage is essential. Barska's dedicated storage solutions offer reliable protection and compliance with firearm safety regulations.

Fireproof Firearms Safes

Ensure your firearms remain intact and secure in the event of a fire with our fireproof safes, designed to withstand extreme conditions. Some of our rifle safes models feature a capacity that ranges from 4 rifles up to

an impressive 45 firearms, allowing you to choose the size that best suits your collection. Additionally, many of our safes come equipped with interior LED lights, illuminating your firearms and making them easily accessible in low-light conditions. For added convenience, some safes offer a top-opening option, providing quick and easy access to your firearms when you need them most.

Barska's commitment to quality and innovation ensures that each Firearms Safe in our collection is built to provide maximum protection, convenience, and peace of mind for firearm owners. Whether you're securing a few rifles or an extensive collection, our safes are designed to meet your specific needs.

Explore our Firearms Safes collection today and invest in the security and protection your firearms deserve

Biometric Rifle Safes

Barska's Biometric Rifle Safe prioritizes both security and quick access for authorized users. This steel gun safe offers a reliable way to safeguard your firearms and valuables, utilizing advanced fingerprint recognition technology for convenient entry. The high-tech system features an optical scanner that meticulously analyzes each fingerprint scan and compares it to the extensive database stored within the safe's memory. This memory can hold up to 120 unique fingerprints, ensuring access for multiple authorized users. For those who require an extra layer of security, the Barska Biometric Rifle Safe boasts one-inch thick steel deadbolts, creating a formidable barrier against unauthorized entry.

Biometric Keypad Rifle Safe

Biometric Fingerprint Recognition

Access your firearms with the touch of a finger. Our advanced biometric system ensures quick and secure access only to authorized users. Store up to 160 fingerprints for added convenience.

External Power Access

External 9V battery backup access provides uninterrupted functionality.

Emergency Backup Keys

For added peace of mind, the safe includes a set of backup keys, ensuring access in case of electronic failures.

Silent Access Mode

For situations requiring discreet access, the safe offers a silent entry option, allowing you to open the safe without any audible sounds.

Anti-Theft Mounting

The safe can be securely mounted to the floor or wall, preventing unauthorized removal and increasing its overall security.

California DOJ Compliant

DOJ-Approved Safety Device means a firearms safety device that has been tested by a certified FSD laboratory, has been determined to meet the standards for firearms safety devices.

Secure Keypad Access

In addition to fingerprint recognition, the digital keypad provides an alternative entry method. Set two unique PIN codes for quick and easy access.

Battery-Powered

The safe operates on batteries, eliminating the need for external power sources and allowing for flexible placement.

Tamper-Proof Construction

Built with rugged materials, the safe's solid steel construction and pry-resistant door provide protection against unauthorized access and tampering.

Spacious Interior

The interior of the safe is designed to accommodate rifles, shotguns, handguns, and other valuables. Adjustable shelving allows for customization to fit your specific storage needs.

BIOMETRIC SAFES

Barska's Biometric Safes Collection combine state-of-the-art biometric technology with reliable construction to ensure your valuables and firearms are protected with unparalleled convenience. Explore our diverse range of Biometric Safes, available in various sizes and purpose-driven designs. Our Biometric Safes collection includes:

All-Purpose Biometric Safes

Versatile safes suitable for a wide range of applications, providing quick and secure access through fingerprint recognition technology.

Firearms Storage Biometric Safes

Responsible gun owners trust Barska's dedicated firearm storage solutions. Our biometric safes offer the perfect blend of security and quick access.

Depository Biometric Safes

For businesses and organizations, our depository-style safes feature a drop slot, making secure deposits convenient and hassle-free.

Medical Biometric Safes

Safeguard your medications and sensitive medical supplies with our specialized medical biometric safes, ensuring authorized access only.

Fireproof Biometric Safes

Protect your valuable documents and items from the ravages of fire with our fireproof biometric safes, combining biometric convenience with peace of mind.

Portable Biometric Safes

On-the-go security has never been easier. Our portable biometric safes are designed to keep your belongings secure wherever you need them.

Barska's commitment to quality and innovation ensures that each Biometric Safe in our collection is built to provide maximum protection, ease of use, and peace of mind. Experience the future of security with Barska's Biometric Safes.

Biometric Safes

Upgrade your security with the unparalleled convenience of Barska biometric safes. These steel innovative safes redefine home and office security by utilizing industry-leading fingerprint scanner technology. Experience the peace of mind that comes with accessing your valuables in seconds with a simple fingerprint scan. No more struggling to find misplaced keys or memorizing frustrating combinations. These safes boast a high-resolution fingerprint scanner that can store up to 120 fingerprints, ensuring access for everyone authorized.

For added discretion, these feature-rich safes offer silent access modes, allowing you to retrieve your belongings without unwanted noise. Motorized deadbolts provide an extra layer of security, giving you confidence that your valuables are protected. For a hassle-free installation, these safes come pre-drilled for mounting and include everything you need to get started, including 4 AA batteries, a protective floor mat, 2 backup keys, and a complete mounting hardware kit.

Keypad Hotel Safes

Experience peace of mind with this series of versatile steel hotel safes. A range of options to perfectly suit the needs of the guest, ensuring valuables are protected with the utmost care. What truly sets these safes apart is their advanced audit trail capability. Each safe meticulously records every access attempt, including the time and method used. This detailed record, accessible through a separate CEU override device, significantly reduces the risk of fraudulent claims and fosters complete transparency for the management team. However, it's essential to note that these hotel safes are not suitable for firearm storage in home or office environments. We prioritize safety and recommend alternative solutions for firearm storage that are specifically designed for this purpose.

- Keypad Memory Can Store 1 PIN Code
- 2 Solid Steel Motorized Locking Bolts
- Interior LED Light
- Easy-To-Read ADA Compliant LED Keypad Display
- Comprehensive Audit Log
- Three Override Methods; Master Code and Spare Keys
- Pre-Drilled Mounting Holes
- Includes Set of Emergency Back-Up Keys, Batteries and Mounting Hardware, CEU Not Included

Hotel Safes

CEU For Hotel Safe HA13536

The hotel safe keypads have comprehensive audit trail capabilities reducing fraudulent liability claims. Each safe has a built-in smart chip that records when the safe was opened, and how it was opened. This recorded information is easily downloaded using our handheld CEU override device, and the logs from the safes are able to be viewed on a specialized computer program provided with the device.

- Computerized Emergency Unit Handheld Device
- Secondary Method to Access the Safes
- Exports Data of the Last Openings of the Safe

Depository Safes

Depository safes, also known as drop safes, offer a crucial line of defense for businesses like retail stores, gas stations, and convenience stores by safeguarding cash and valuables from theft. Instead of accumulating large amounts of cash in registers, employees can simply deposit them through a secure access slot in the steel safe. This not only deters theft but also simplifies cash handling for businesses that make frequent bank deposits. For peace of mind in the long term, Barska depository safes come equipped with backup keys and other security features, such as thick steel bodies and time delay combination locks, ensuring continued access even in situations where batteries die or numeric codes are forgotten.

Keypad Locks

Depository Safes with Keypad locks provide secure access control, with programmable codes for authorized personnel.

Biometric Locks

Depository Safes with Biometric options offer an added layer of security, ensuring that only registered individuals can access the safe via fingerprint recognition.

Spacious Interior

Larger models feature generous storage capacity accommodates various items, making it an ideal solution for businesses, retail establishments, or personal use.

Strong Construction

Built with robust materials, these safes are designed to withstand tampering and resist forced entry, providing an extra layer of security.

Anti-Fishing Mechanism

Select models features anti-fishing technology, preventing unauthorized retrieval attempts through the deposit door.

Bolt-Down Capability

Ensure maximum security by easily bolting down the safe to prevent any unauthorized removal, select models.

2.58/4.68 Cubic Ft Rotary Two Keypad Depository Safe

- Top Loading Rotary Drop Door is Engineered for Larger Drops Such as Envelopes and Deposit Bags. Simply Turn the Handle and the Drum Rotates to Drop the Items Securely Into the Safe
- 2 Secured Separate Compartments
- Allows Quick Deposits and Secure Storage Without Access Inside the Safe
- Internal Adjustable and Removable Shelf

Keypad Depository Safe Features

The Keypad Depository Safe offers a comprehensive security solution that is both user-friendly and reliable. Its advanced features, such as the ability to store 1 Master Code and 5 User Codes, ensure that access is strictly controlled. The Lock Out Mode further enhances security by preventing unauthorized entry in case of multiple incorrect code attempts. The pre-drilled mounting holes make installation quick and easy, while the included set of emergency back-up keys provides a convenient alternative in case the battery runs low. Powered by a single 9V battery, the safe is energy-efficient and requires minimal maintenance. Overall, the Keypad Depository Safe is a dependable and versatile storage solution that is ideal for protecting valuable items.

Depository Safes

Depository safes, (also known as drop safes) offer a vital layer of security for businesses, safeguarding cash from theft and internal threats. These steel safes eliminate the risk of accumulating large sums in registers by allowing employees to deposit valuables through a secure access slot. For added protection against retrieval attempts, standard and large models feature anti-fishing baffles and jagged teeth within the deposit slot. Compact models prioritize ease of use with a user-friendly deposit slot. For long-term peace of mind, Barska depository safes include backup keys in case batteries die or combination codes are forgotten.

Depository Safes

Depository Safes

Depository safes, ideal for businesses like hotels, gas stations, motels, restaurants, and high-volume cash retailers, provide secure short-term storage for cash and valuables. These steel safes prevent theft attempts through the deposit slot with anti-fishing baffles and jagged teeth (standard and large models only). For long-term access, Barska depository safes include backup keys in case batteries die or combination codes are forgotten.

Biometric Wall Safe

MEDICAL WALL SAFES AND CABINETS

Introducing our Medical Wall Safes and Cabinets – your trusted solution for secure and organized storage of medical supplies. Crafted with precision and designed for efficiency, our cabinets provide a seamless blend of functionality and durability in healthcare settings. Elevate your medical storage with these key features:

Organizational Excellence

Optimize your workflow with thoughtfully designed interiors, featuring adjustable shelves, drawers, and compartments tailored for the systematic storage of medical instruments, medications, and equipment.

Secure Locking Mechanisms

Prioritize patient safety and confidentiality with secure locking mechanisms, providing authorized access to medical professionals while preventing unauthorized entry.

Versatile Configurations

Choose from a range of cabinet sizes and configurations to suit the specific needs of your medical facility. Whether it's a wall-mounted unit or a standalone cabinet, our collection offers flexibility to accommodate diverse requirements.

Space Optimization

Maximize your available space with our cabinets designed for efficiency. Wall-mounted options save floor space, while spacious interiors allow for ample storage without sacrificing accessibility.

Biometric Wall Safe

Secrecy is your best defense! These in-wall steel hidden safes offers ultimate discretion, easily disguised behind pictures, mirrors, or furniture. Its flush-mounted design keeps it virtually undetectable. For added peace of mind, an emergency key overrides the biometric scanner, ensuring access even if forgotten. Two removable shelves provide flexible organization for valuables like medications, jewelry, and important documents.

Features

- Fingerprint Control Can Store up to 120 Users
- Two Solid Steel Locking Bolts
- Pre-Drilled Mounting Holes
- Operates on 4-AA Batteries (Included)

Includes

- 2 Removable Shelves
- Protective Floor Mat
- Emergency Back-Up Keys
- Mounting Hardware

Medical Security Cabinet

Ensuring the safety and organization of medications and medical supplies is crucial in healthcare settings. These secure cabinets, ideal for doctors' offices, hospitals, clinics, schools, and rehab centers, offer a comprehensive solution. A key-lock system restricts access to authorized personnel only, providing peace of mind. Pre-drilled holes allow for convenient wall or door mounting, maximizing space. The full-opening door grants unhindered access to all contents, while the sturdy, heavy-duty construction endures daily use. Choose from three sizes with varying interior configurations to perfectly suit your specific storage needs.

Cell Phone Storage Cabinet

Maximize your workspace efficiency and device security with our Cell Phone Storage Cabinet. This versatile cabinet features 36 individual slots, each designed to securely hold smartphones or other small electronic devices. Perfect for offices, classrooms, or any shared space, this cabinet helps prevent theft, damage, and clutter. The cabinet's compact design allows for easy placement on desks or shelves, and its sturdy construction ensures long-lasting use. With our cabinet, you can easily keep track of your devices and ensure they are always charged and ready to use. The individual slots provide ample space for each device, preventing them from scratching or colliding. The cabinet's sleek design complements any workspace aesthetic, while its durable materials guarantee years of reliable service. Additionally, the cabinet is equipped with a key lock for added security and a convenient carry handle for easy portability, making it ideal for transporting devices between locations or storing in a secure location.

Key Storage Cabinets

These key cabinets offer a comprehensive solution for keeping your keys organized and secure in various locations, including homes, offices, apartment complexes, property management companies, car dealerships, and body shops. These cabinets come in a range of sizes, from compact models ideal for home or small office use to large industrial cabinets that can hold hundreds of keys.

Each cabinet features a secure locking door for peace of mind, along with a variety of features to promote organization. Most models include a continuous piano hinge for a full view of all your keys, an indexing chart for documenting key location and corresponding locks, and a handy drop-in plastic sleeve for quick reference without opening the cabinet fully. These key cabinets also boast flexible storage options, allowing you to hang keys with or without key tags, or use key rings for multiple keys. Easy installation is ensured with pre-drilled holes and included mounting hardware. Built with sturdy construction, the key cabinets are designed to withstand daily use and come backed by a one-year limited warranty for added confidence. From small to large, there's a perfect key cabinet solution for your needs.

Key Lock Box With Combination Lock

Key lock boxes with combination locks provide benefits like secure key storage, convenient access for authorized individuals, flexibility through code changes, and the ability to grant temporary access without physical key handovers.

- Single Combination Lock
- All Steel Construction
- Solid Steel Key Hooks
- Pre-Drilled Mounting Holes

Combination locks allow for keyless entry, increased security through customizable codes, and durability since they have fewer mechanical parts prone to wear compared to traditional locks.

Breakable Emergency Key Boxes

Ensure swift access in critical moments with these Breakable Emergency Key Boxes. Crafted from durable steel, these secure boxes provide reliable protection for your restricted door keys. The dedicated compartment can accommodate a single key or a small key set, while the bright red exterior and clear glass panel offer instant visibility. In emergencies, the included hammer efficiently breaks the glass, granting immediate access. For convenient installation, the box comes with pre-drilled holes and mounting hardware. Trust in our Breakable Emergency Key Boxes for peace of mind and rapid response during unforeseen circumstances.

Multi-Key Lock Boxes & Photo Key Holder

Photo Key Holder

Keep your keys organized and cherished memories close with this unique key holder. Combining style and function, this versatile design features a stylish picture frame for your favorite 4" x 6" photo, concealing a hidden key rack within. Simply lift the frame to reveal 10 convenient hooks for safely storing your keys. A secure magnetic closure keeps the frame shut, protecting both your keys and photo. Includes key tags and mounting hardware for easy installation.
